

Administration – Remote access

You have the possibility to give a customer or a colleague a temporary, limited access (in passive mode) to follow a vehicle. The person that is granted access has to click on the URL in the e-mail the system has sent him.

The screenshot shows a web form titled "Remote access" with the following fields and callouts:

- Device :** P886 (dropdown menu) - Callout: "Name of the vehicle to follow"
- Starting date :** 23/04/2015 09:32 (calendar and time pickers) - Callout: "Period over which you grant access to the localisation of the vehicle"
- Ending date :** 24/04/2015 09:32 (calendar and time pickers)
- From :** valerie.cosse@ubidata.com
- To :** (empty text field) - Callout: "email address of person you grant access"
- Subject :** Remote access

The message body contains the following text:

Dear Customer,

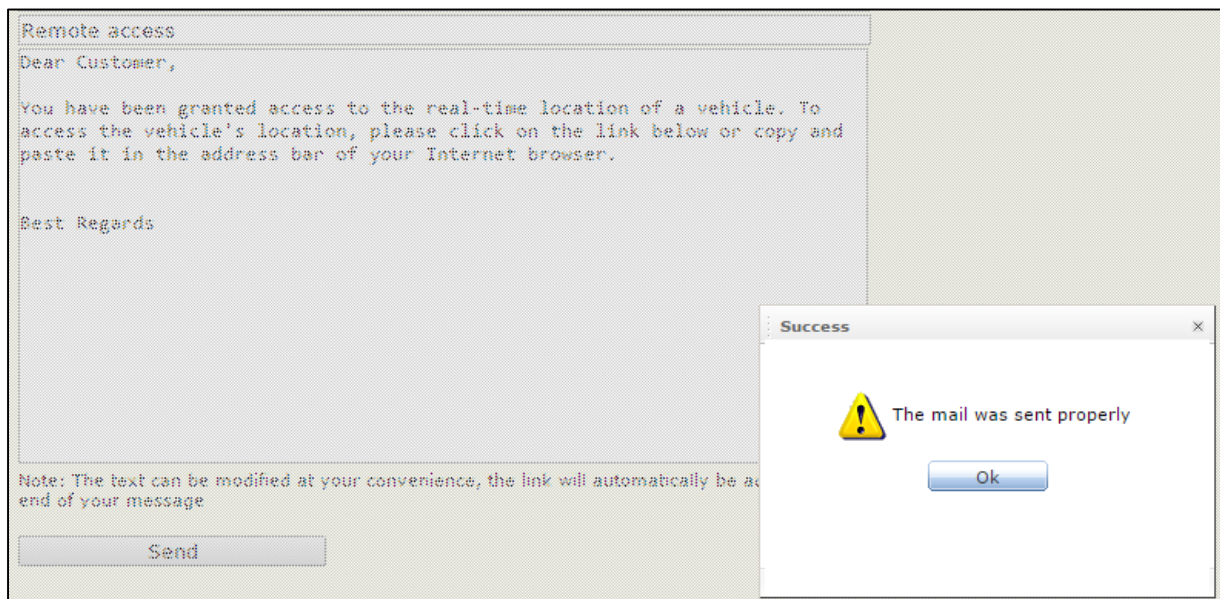

You have been granted access to the real-time location of a vehicle. To access the vehicle's location, please click on the link below or copy and paste it in the address bar of your Internet browser.

Best Regards

Note: The text can be modified at your convenience, the link will automatically be added at the end of your message

Send

A pop-up notifies you if the message has been sent correctly.

The client receives then a mail with a link to an internet page that looks like:
